

## Introduction of the Automated Systems for Customs Data ASYCUDAWorld

The following table is a list of requirements to run the ASYCUDAWorld system. The workstations are computers intended to be used by users to connect to the ASYCUDAWorld server.

<b>ASYCUDAWorld workstation requirements</b>	
<b>Computer</b>	Desktop or laptop
<b>Internet</b>	1MBPS Bandwidth (This can vary depending on the number of PC / laptops using the connection concurrently)
<b>Document scanner<sup>1</sup></b>	
<b>PDF Reader<sup>2</sup></b>	
<b>Browser</b>	All browsers are good to run the system
<b>Java</b>	Java Runtime Environment JRE 1.8

1. A document scanner is not mandatory but will be used to upload files into the system.
2. PDF reader is not mandatory to run ASYCUDAWorld but will be required to open some documents generated by the system.
